Profile

Full Stack Developer with nearly 2 years of practical experience building scalable web platforms, AI integrations, and high-performance digital products. Proficient in the modern JavaScript and TypeScript ecosystem, specializing in React, Node.js, and NestJS to engineer clean, component-based user interfaces and robust backend architectures. Experienced in designing and consuming REST and GraphQL APIs, managing relational and NoSQL databases, and delivering reliable software from initial design to production release. A strong advocate for clean code principles, modular system design, and maintainable application structures. Skilled at collaborating across cross-functional teams, solving complex business challenges, and rapidly adapting to new technical stacks to build efficient, scalable, and user-centric web applications.

Professional Experience

Software Engineer, Thoughtline
2025 Jan – Present
Thiruvananthapuram

* Managed multiple client and internal web applications, balancing independent end-to-end development with collaborative team-based work.
* Built and deployed full-stack web applications from the ground up, handling everything from architectural decisions and development to testing and production releases.
* Implemented automated end-to-end testing using Playwright, ensuring application stability and reducing manual testing efforts before production releases.
* Developed an AI-powered full-stack application that automatically transforms messy, unstructured data into polished, professionally formatted resumes from scratch.
* Built a comprehensive fleet management system to streamline logistics, track assets, and improve overall operational efficiency.
* Integrated AI capabilities into various platforms, including custom AI chatbots with memory handling and APIs for automated data processing.
* Built scalable e-commerce applications featuring complete product management, seamless user checkout flows, and secure payment integrations.
* Developed online learning platforms with dynamic content delivery, structured course management, and strict user access controls.
* Designed interactive Power BI dashboards, working directly with business users to translate their requirements into clear data models and visual insights.
* Secured multiple applications by implementing robust role-based access control (RBAC), user authentication, and safe API handling.
* Partnered daily with designers, fellow developers, and stakeholders to ensure all features were delivered on time and met business goals.
- Built a high-performance multi-tenant architecture, allowing multiple organizations to run securely on a single codebase while maintaining custom role-based access controls.

ERP & HRMS Implementation Support, NDimensionZ Solutions Pvt Ltd
2024 Oct – 2024 Dec
Ernakulam, India

Supplyco Project

- Supported the implementation of **ERP software** for accounting, procurement, and inventory management, ensuring seamless integration with business operations.
- Assisted in data migration, system configuration, and testing to align ERP systems with organizational workflows.
- Provided post-implementation support and conducted user training to ensure smooth ERP system adoption and improved efficiency.
- Assisted in the deployment and management of **HRMS (Human Resource Management System)** to handle employee data, including attendance, payroll, and other personnel details.
- Ensured smooth operation of HRMS by troubleshooting and providing ongoing support for system enhancements.

ASP .NET FULL STACK, Luminar Technolab
Intern
2024 Jun – 2024 Nov
Ernakulam, India

Education

Bcom Commerce With Computer Application, College of Applied Science Adoor
2021 – 2024

PLUS TWO COMMERCE WITH COMPUTER APPLICATION, DVHSS THALAVOOR
2019 – 2021

SSLC, GVHSS PATTAZHY
2018 – 2019

Technical Skills

- React
- HTML
- CSS
- Bootstrap
- JavaScript
- ASP.NET
- c#
- Node.js
- Typescript
- Nest Js
- Wordpress
- Power BI
- Keycloak
- PostgreSQL
- MongoDB
- MySQL
- MS SQL
- S3
- Terraform
- Lambda
- Claude Code
- Ai tools
- Prompting
- Technical support
- Docker
- Cerbos
- Playwright
- Php

Soft Skills

- Time Management
- Problem Solving
- Quick Learner
- Leadership
- Adaptability
- Communication

Projects

BUYIT: E-Commerce Website
Developed **BUYIT**, an eCommerce platform using Asp Dot Net ,C#, and MS SQL Server. The project includes:

- **Admin Side:** Features such as adding and editing product categories, managing product listings (add/edit products), and tracking orders.
- **User Side:** Users can browse categories, view products, add items to the shopping cart, and securely complete purchases via a payment gateway.

Arivu AI – Educational Chatbot Platform
Tech Stack: React, Node.js, Firebase (Database & Storage)
- **Built a full-stack AI chatbot** using **React** and **Node.js** to deliver automated learning support and instant doubt resolution for students.
- **Integrated Firebase Storage & Firestore** to securely manage study materials, user sessions, and real-time chat histories.

Astra Chat Bot Builder – AI-Powered Chatbot Platform
Tech Stack: React, TypeScript, Node.js, Hosted Backend, Firebase, Gemini AI
May 2025 – Jun 2025
- **Engineered a full-stack, no-code chatbot builder** using **React, TypeScript, and Vite**, enabling users to design, configure, and deploy custom AI assistants with real-time previews.
- **Architected a hosted server backend** integrated with Gemini AI, optimizing API routes to handle custom persona configurations and eliminate response latency.
- **Developed an embeddable script framework** for seamless integration into third-party websites with minimal host configuration.
